

Dr Sreeram

Consultant Head and Neck Oncology - Sri Shankara Cancer Hospital and Research Centre, Bangalore, India

Dr Sreeram is an Oral and Maxillofacial Surgeon with a specialized focus in Oral/Head and Neck Oncology. He brings a comprehensive understanding of complex malignancies such as Oral Cancer, Oro-Pharyngeal Cancer, salivary gland and laryngeal cancer. Renowned for his adeptness in tobacco cessation counselling and advanced surgical techniques, including laser surgery for potentially malignant lesions and ablative surgery for locally advanced oral cancer cases, he strives to optimize outcomes while minimizing morbidity.

Beyond clinical practice, he is deeply committed to addressing healthcare disparities through community oncology programs and rural outreach initiatives, and as a co-investigator in diverse clinical trials, he actively contributes to the evolution of oncological research and innovation. With a collaborative spirit and unwavering dedication, he endeavours to provide evidence-based, compassionate care while advancing the forefront of oral and maxillofacial oncology.

Dr Sreeram is committed to promoting diversity and inclusivity in research and is passionate about collaborating with others to drive positive change in cancer care.
